

Call of Duty Black Ops 2

Search Table

By: Manuel Toro, Erick Barajas

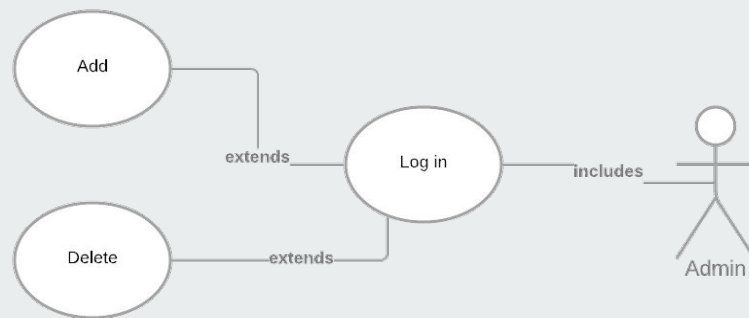

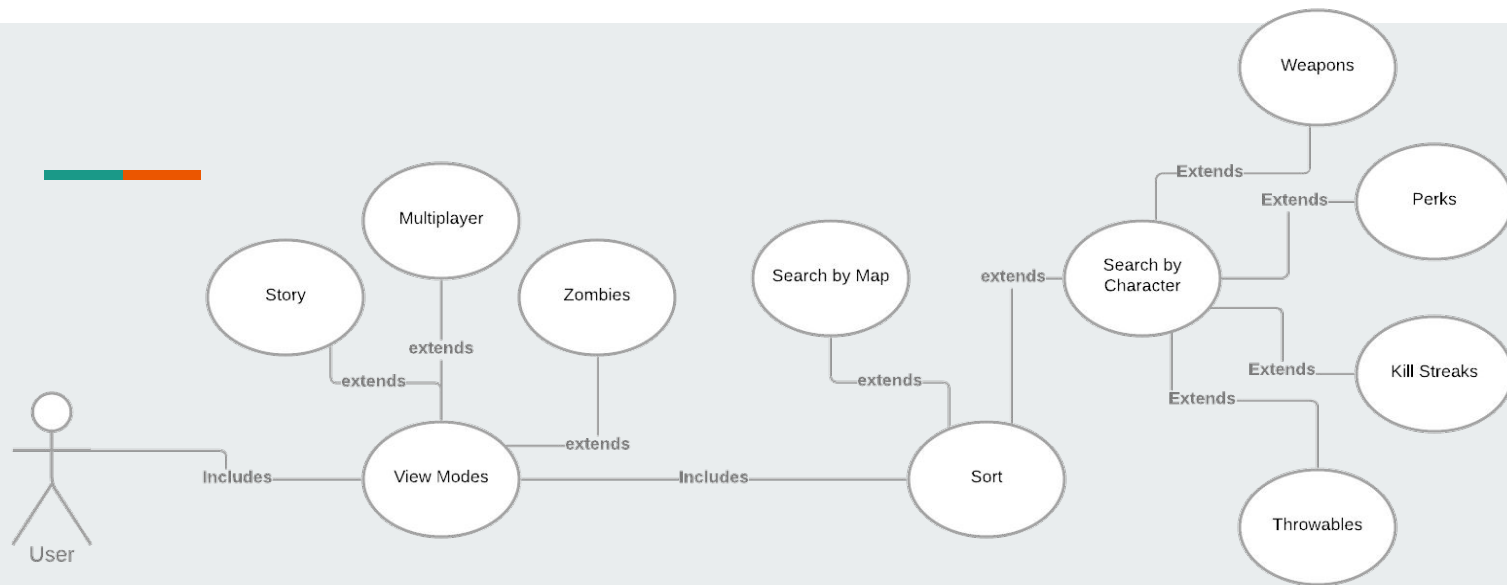

Project Description

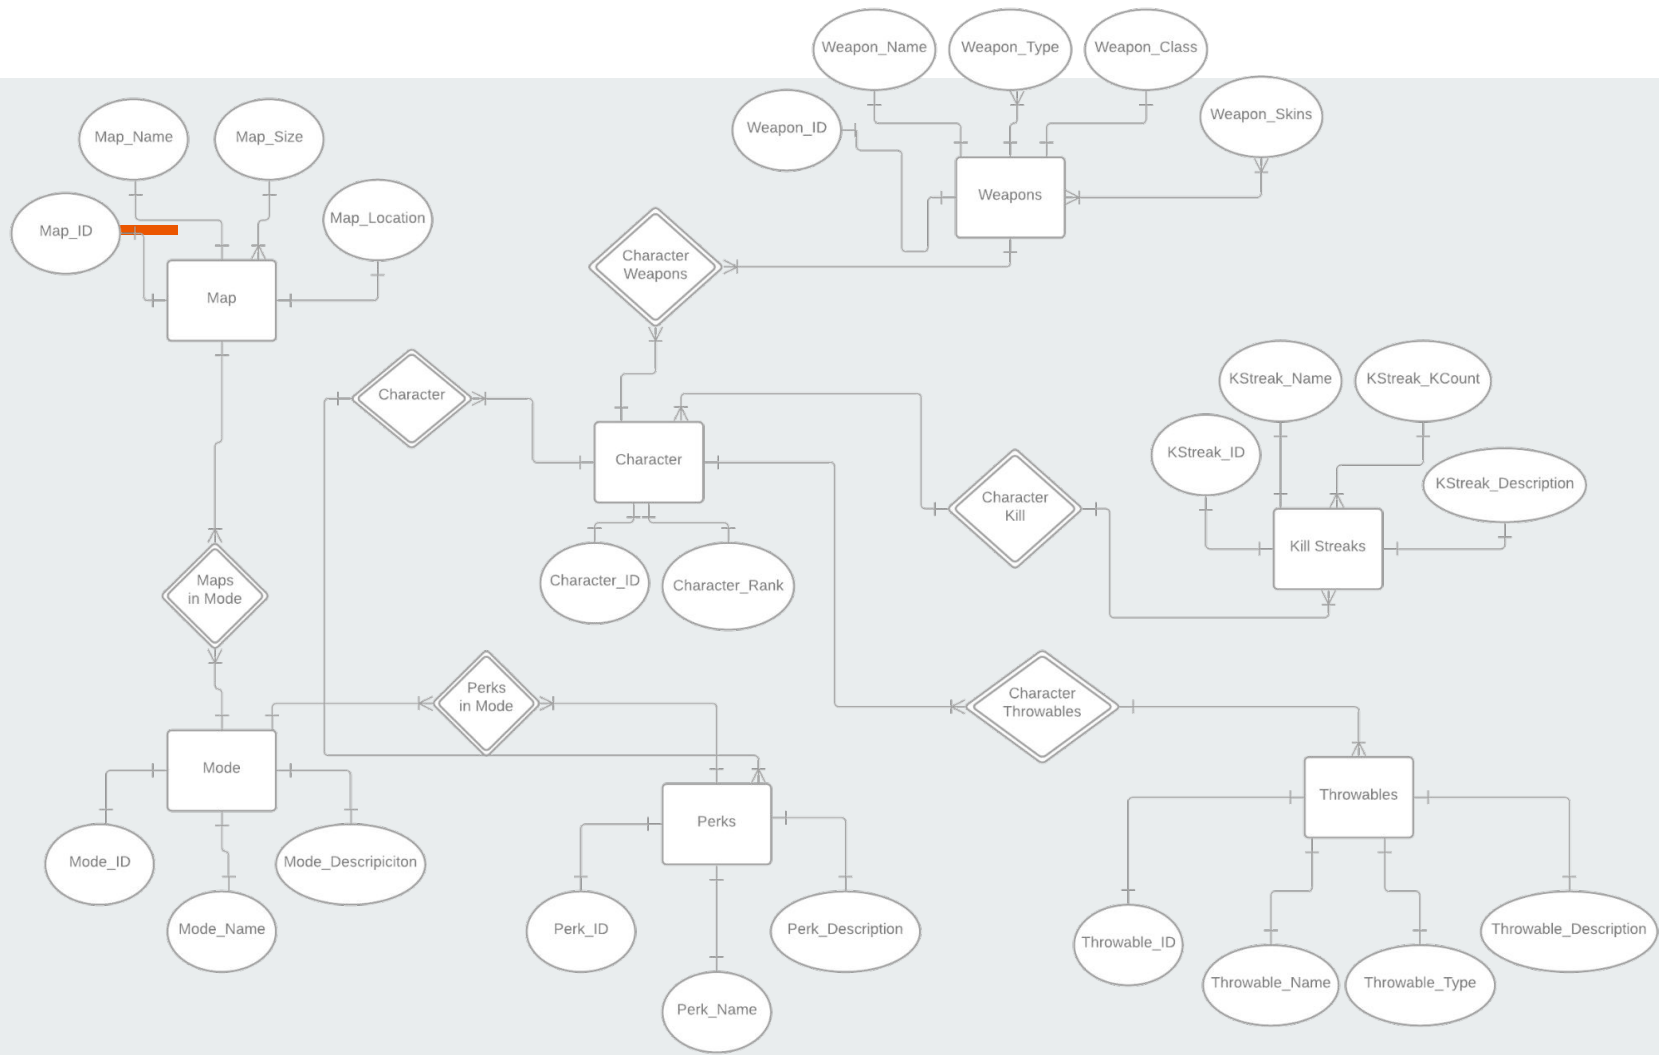

- We are planning on creating a web app that will help users search through the available maps, weapons, and items in the game Call of Duty Black Ops 2
- The web app will begin on a page that allows the user to pick what game mode they want to look through.
 - This can be either the story mode, the online multiplayer or the zombie mode.
- After selecting the mode the user can select between either sorting by maps or going into more specific things like the weapons or other items.

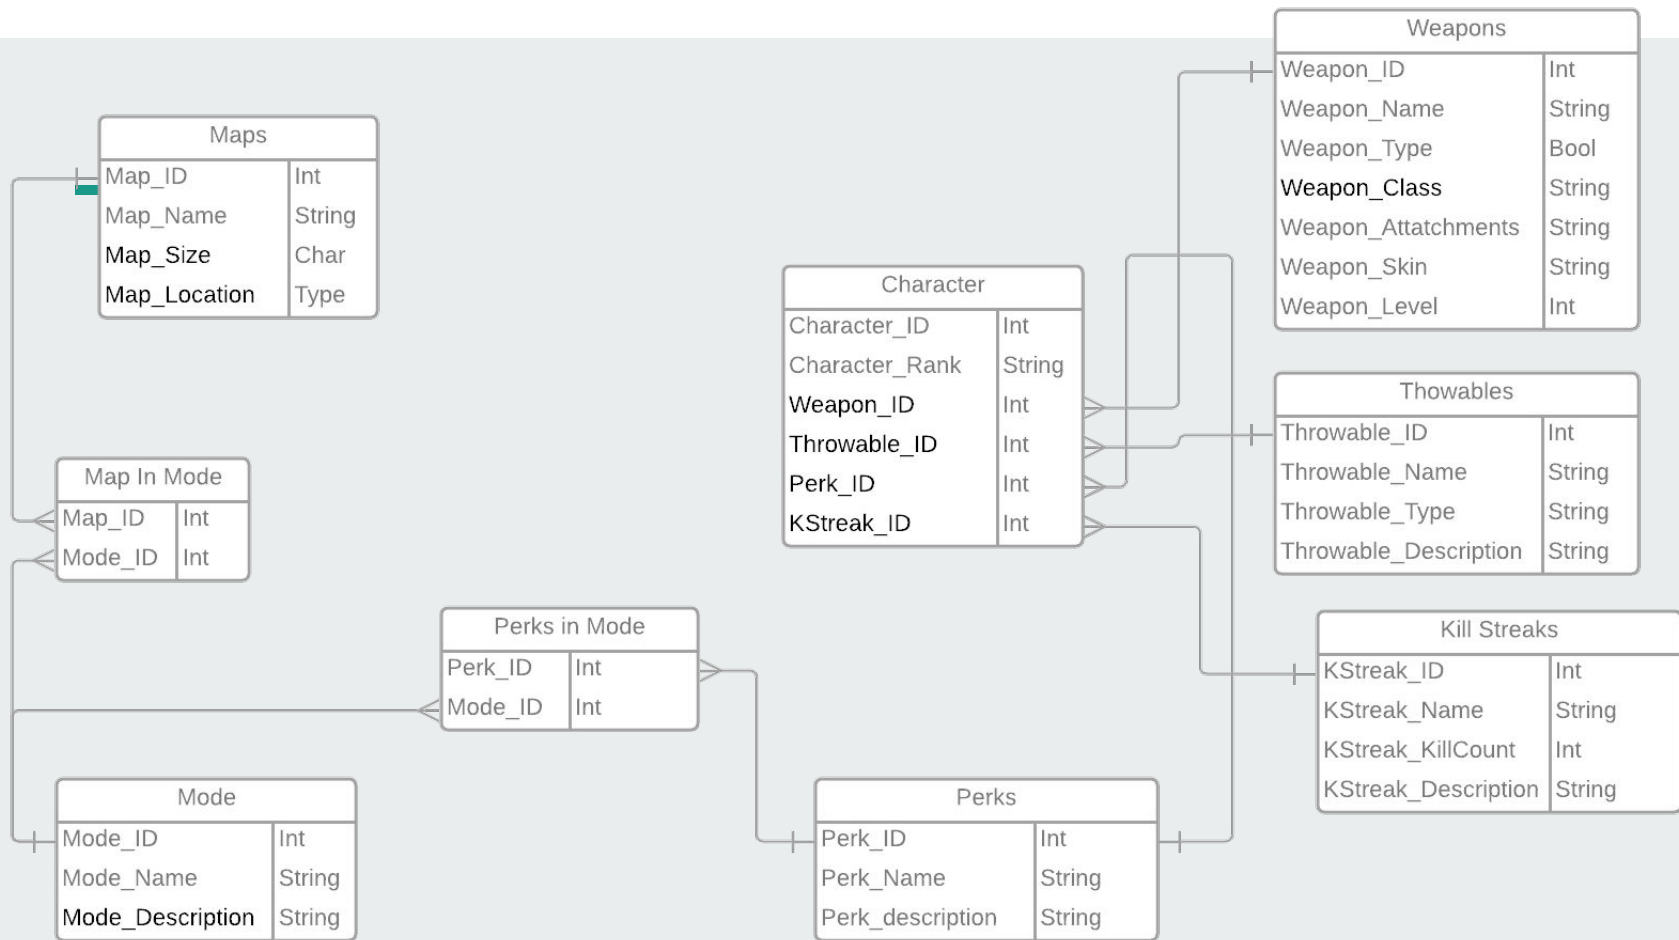

Bonus Features

- If we get enough time we want to also add an admin page
 - This will allow the admin to login and edit the information on the database
